

Easy-to-administer, on-site oral fluid drug test

- Ideal for detecting recent drug use (previous 24 -48 hours) especially for marijuana
- Industry-leading laboratory turnaround times that help drive faster hiring decisions
- Blue indicator window identifies when an adequate specimen volume has been collected
- Observed, tamper-resistant collection, typically taking less than 5 minutes

Wide range of drugs:

Amphetamines
Cocaine
Marijuana
Methamphetamines
Opiates (*Morphine, Codeine, Hydrocodone, Hydromorphone, 6AM*)
Oxycodones (*Oxycodone, Oxymorphone*)
PCP

Oral-Eze® simplifies the detection of recent drug use
